**Abstract of the Talk**

The webinar is about the first global standard for digital skills and readiness that was recently endorsed by the IEEE Standards Board. Moving beyond IQ and EQ, let us now welcome DQ, a measure for determining one's digital intelligence. In this webinar, we will discuss the following competencies: (1) digital citizen identity, (2) usage and screen time, (3) safety and cyber bullying, (4) cyber security, (5) emotional intelligence and empathy, (6) communication and digital footprint, (7) literacy and critical thinking, and (8) rights and privacy management. The webinar will further discuss a tech skill-building platform that runs on VS Code that's geared toward learning the enterprise computing skills that drives millions and millions of transactions per second, brought presented by IBM.

**All are welcome:**

Please circulate this to all your interested colleagues, associates and friends. Please register in large numbers and derive maximum benefit. **Advance registration is mandatory for participation. Participants will also get Participation Certificate.**
