Pre-requisite of Research

- Research: Research is an art of scientific investigation or technique. In other words, research is a systematized effort to gain knowledge and it is a process of collecting, evaluating, and interpreting information to answer questions.
 - o Research topic should be relevant.
 - o Appropriate research instruments and taxonomy should have research capacity.
 - Understanding the scientific methods is required to work out the research plan and design.
 - The research must be conducted with a certain and definite aim, objective and purpose.
 - o Researchers need to follow a prescribed writing style such as APA, MLA, etc.

Pre-requisite of Research

- The research process involves four major steps: posing a question, setting a hypothesis, collecting data to analyze the posed issue, and presenting answers to the posed question.
- The steps for conducting research include choosing a topic, identifying a problem, formulating research questions, creating a research design and writing a research proposal.
