**Abstract of the Talk**

*The Internet of Behaviors (IoB) extends the Internet of Things (IoT) by not just collecting data from connected devices, but also analyzing and interpreting it to understand and influence human behavior. This lecture will introduce IoT fundamentals and trace the evolution toward IoB, explaining how sensor data, analytics, and behavioral science come together to drive personalized actions. Real-world examples from insurance, fitness, retail, smart cities, and healthcare will illustrate current applications, while future possibilities in education, energy, and policy will be explored. The session will also highlight the critical ethical, privacy, and security considerations that must guide IoB's adoption in society.*

**All are welcome:**

Please circulate this to all your interested colleagues, associates and friends. Please register in large numbers and derive maximum benefit. **Advance registration is mandatory for participation. Participants will also get Participation Certificate.**
