Abstract of the Talk	*Artificial Intelligence is no longer just a futuristic promise — it is shaping our digital lives in profound ways today. The recent Gemini Nano Banana trend highlighted both the excitement and the unease surrounding AI-powered creativity: millions joined the wave of cinematic selfies and 3D portraits, only to confront unexpected risks around privacy, misuse, and trust. In this webinar, our expert Prof. Daman will unpack what such viral phenomena reveal about the broader AI landscape. He will explore how generative AI amplifies long-standing internet risks, why deepfakes and voice-cloning scams are no longer rare anomalies, and what individuals and organizations must do to stay prepared. At the same time, he will also look at the real prospects and opportunities AI creates in business, education, and society when applied responsibly. Participants will gain a balanced, practical view of AI's current trajectory — beyond hype, towards resilience and readiness.*

All are welcome:
Please circulate this to all your interested colleagues, associates and friends. Please register in large numbers and derive maximum benefit. **Advance registration is mandatory for participation. Participants will also get Participation Certificate.**
