Abstract of the Talk	*This session explores how GitHub Copilot, an AI-powered coding assistant developed by GitHub and OpenAI, can transform the way developers write code and enhance overall productivity. Participants will learn how Copilot leverages artificial intelligence to generate code suggestions, automate repetitive tasks, and streamline the software development workflow.* *The session will cover how Copilot integrates into popular development environments, its key features, and practical demonstrations of its use in real coding scenarios. Attendees will also gain insights into best practices for using Copilot responsibly, understanding its limitations, and maintaining code quality and security while leveraging AI assistance..*

All are welcome:
Please circulate this to all your interested colleagues, associates and friends. Please register in large numbers and derive maximum benefit. **Advance registration is mandatory for participation. Participants will also get Participation Certificate.**
