Abstract of the Talk	*This session covers the transformative role of unified data platforms that combine data lakes and warehouses into a single, cost-effective solution. Audience will gain insights into open table formats (Delta Lake, Apache Iceberg, Apache Hudi), and best practices for building scalable, performant, and reliable lakehouse solutions. The session includes a live working demo where we'll build an end-to-end lakehouse pipeline, demonstrating data ingestion, transformation, and querying in real-time. Whether you're a data engineer, architect, or technology enthusiast, leave with hands-on examples and practical resources to start your lakehouse journey immediately.*

All are welcome:
Please circulate this to all your interested colleagues, associates and friends. Please register in large numbers and derive maximum benefit. **Advance registration is mandatory for participation. Participants will also get Participation Certificate.**
