Link and Fee**

Registration Link: <http://bvicam.ac.in/webinars/>

No registration fee. It is absolutely free for the members of IEEE, CSI, IETE, ISTE, ISCA, IITP and Bharati Vidyapeeth, with pre-registration

**Abstract of the
Talk**

AI is rapidly evolving from systems that simply respond to prompts into intelligent agents that can reason, act, and learn autonomously. This session traces that journey – from Large Language Models (LLMs) to Retrieval-Augmented Generation (RAG) systems, and now to Agentic AI, where models become adaptive, context-aware collaborators.

We'll explore how principles of system design are driving this shift – enabling modular, compound AI systems that integrate reasoning, action, memory, and reflection. Attendees will gain a clear view of how these advances are transforming AI from a powerful tool into a trusted partner in innovation and problem-solving.

All are welcome:

Please circulate this to all your interested colleagues, associates and friends. Please register in large numbers and derive maximum benefit. **Advance registration is mandatory for participation. Participants will also get Participation Certificate.**
