**Abstract of the Talk**

*This webinar shows you how to use AI as a structured research partner so you can go from “I’m new to this” to a solid working understanding in about 30 minutes—without getting lost in endless links or messy notes. We’ll walk through a repeatable workflow for rapid learning: clarify the question, surface the core concepts and vocabulary, map how ideas connect, identify the most trustworthy sources, and quickly test your understanding with examples. Along the way, we’ll share practical techniques and prompt patterns you can reuse immediately. We’ll also cover the common failure modes—hallucinations, shallow summaries, confirmation bias, and over-reliance on AI—and how to catch them early. By the end, you’ll have a clear blueprint and ready-to-use templates to research faster, retain more, and explain new topics with confidence.*

**All are welcome:**

Please circulate this to all your interested colleagues, associates and friends. Please register in large numbers and derive maximum benefit. **Advance registration is mandatory for participation. Participants will also get Participation Certificate.**
